

Measurements

Name:

Email Address:

How To Measure: Do not measure over clothing. Measure with undergarments similar to those you will wear with your dress. The measurement tape should be placed around your body as outlined below and should not be pulled too tight or have too much slack.

Bust: Measure across the back and fullest part of the bust. (not under the bust).

Upper Bust: Measure your upper bust as if you were wearing a strapless dress. The tape should go around your back, up under your underarm and across the top of your bust.

Under Bust: Measure your under bust and around your back where the underwire in your bra sits. This should be a firm measurement

Waist: Measure across the narrowest part of the natural waist. Bend to one side to find the natural waist.

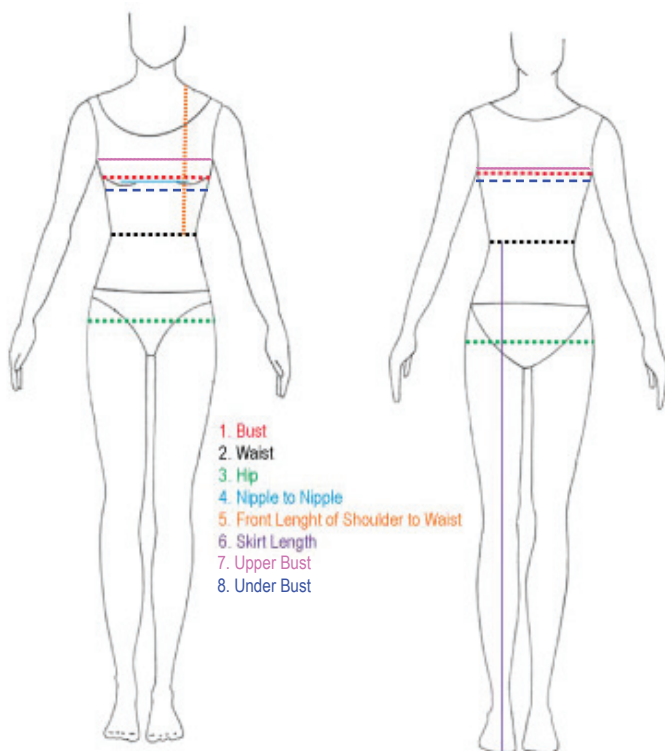

Hips: Standing with feet together, measure at the fullest part of the hip.

Nipple to Nipple: Wearing appropriate undergarments, measure the distance from nipple to nipple.

Front Length of Shoulder to Waist: Measure from shoulder to waist down across your bust to the waist. Keep the tape measure line straight up and down.

Skirt Length (waist to floor): Wearing your shoes (or shoes with the heel height you are going to wear on the day) measure from your waist to the floor.

You will need to provide these measurements during checkout. You can enter them in the 'instructions' space provided.
